NAME: Mugendi Rodgers Munene

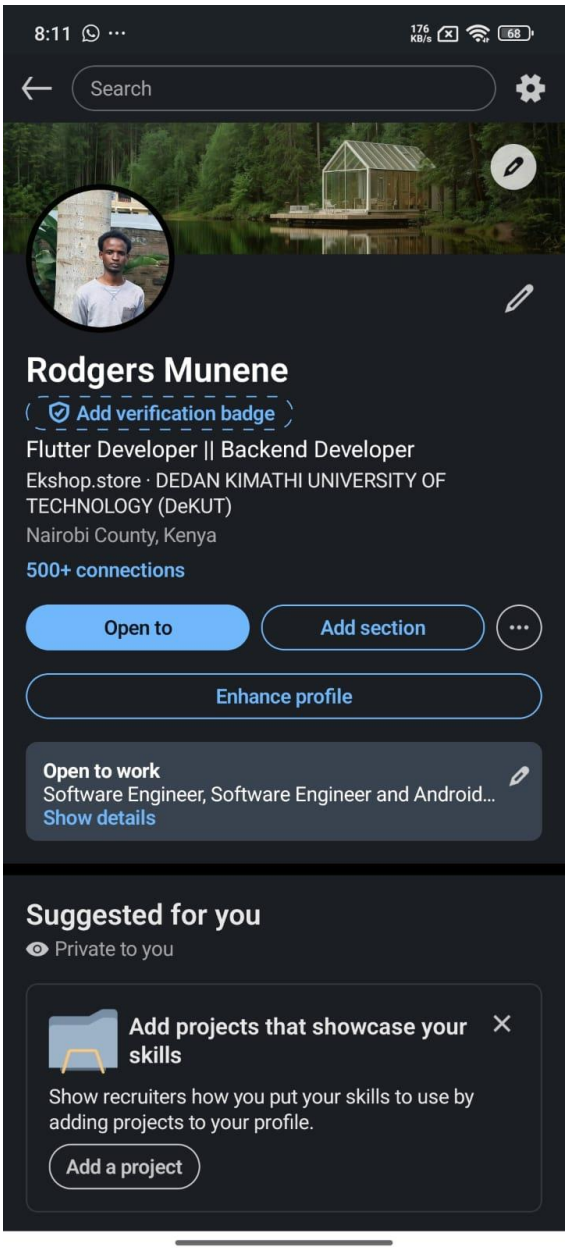
REGISTRATION NUMBER: C026-01-0939/2022

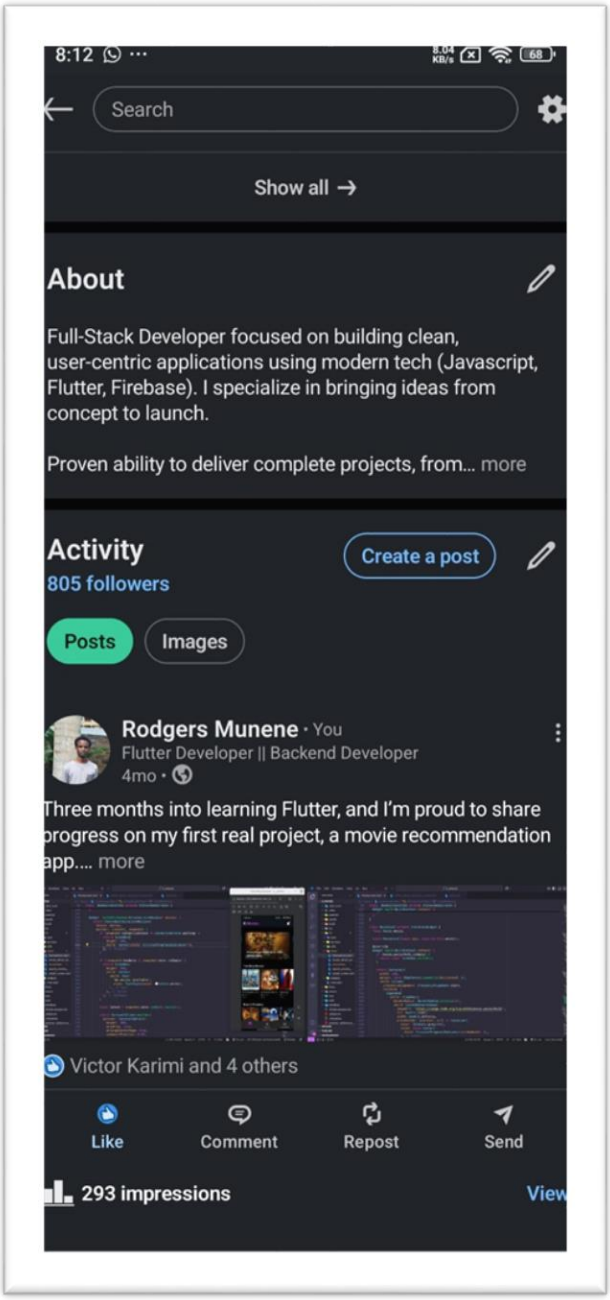
COURSE CODE: CCS 4102

SEMESTER: Year 4, Semester 2

Page 2: Professional Networking

Platform 1 – LinkedIn





Usage & Relevance: I utilize LinkedIn as my primary digital resume and networking hub. In the field of software development and technology, having a visible professional history is crucial. This platform allows me to connect with industry leaders, alumni, and recruiters. It supports my professional growth by keeping me updated on emerging tech trends (like AI integration and cloud computing) and offers a space to showcase certifications and endorsements. It

effectively validates my skills to potential employers before an interview even takes place.

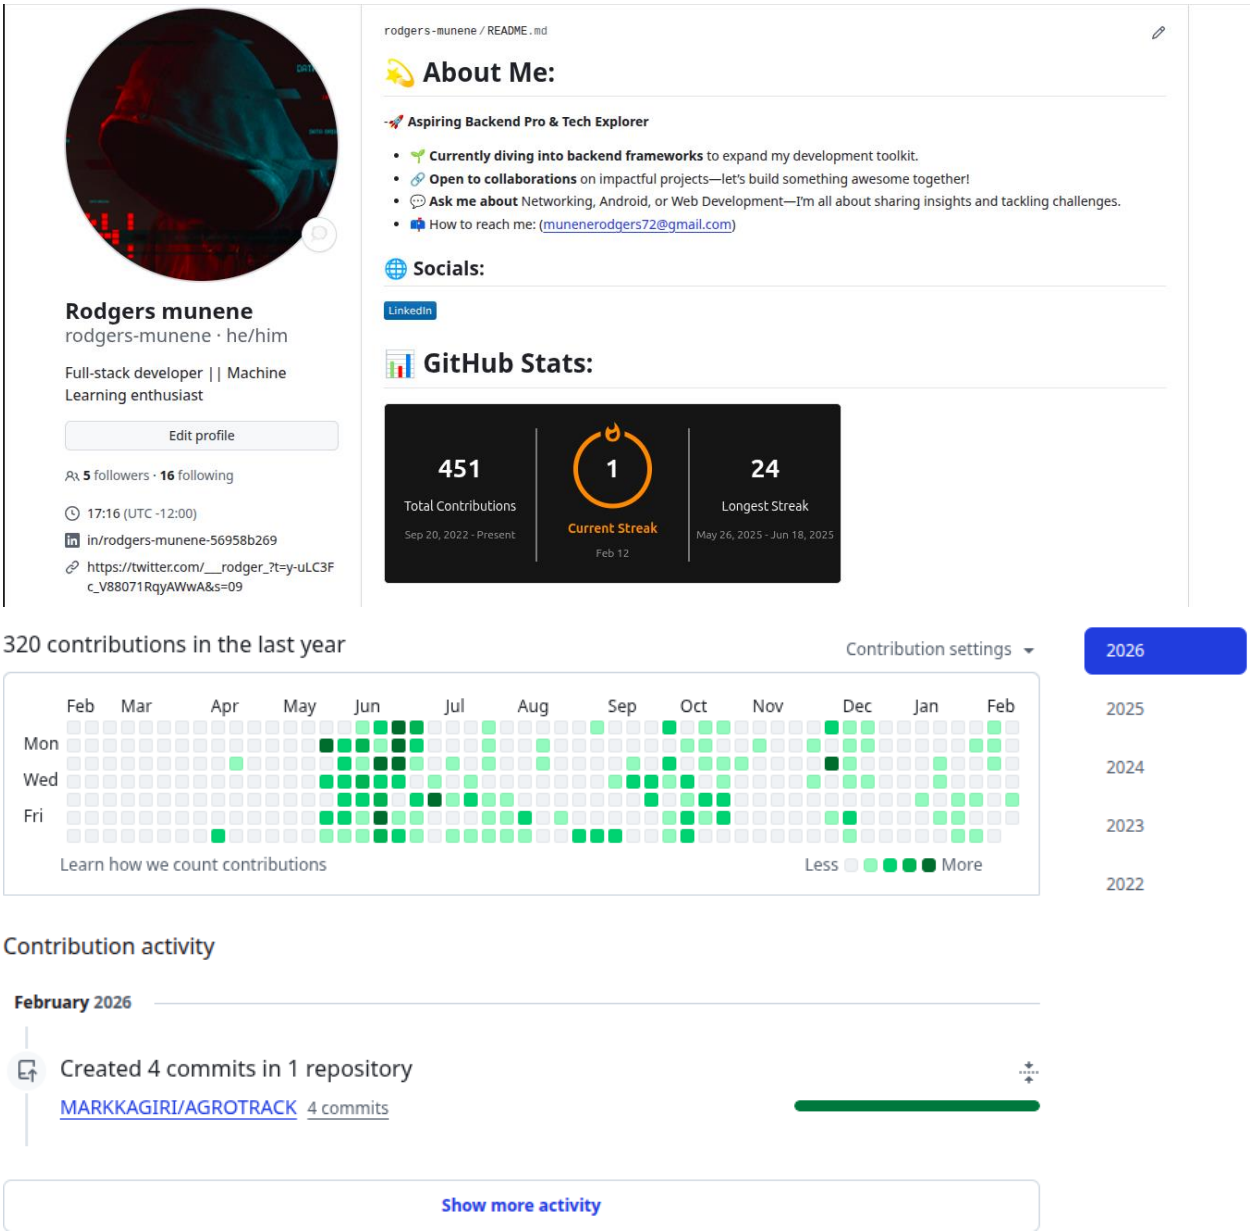
Platform 2 – GitHub



Key Repositories:

- **AgroTrack:** A digital solution designed to streamline agricultural management, featuring inventory tracking and yield analysis.
- **SwiftCart:** A robust e-commerce platform prototype demonstrating secure payment integration and dynamic product rendering.

Demonstration of Skills: GitHub is central to my identity as a developer. It serves as concrete proof of my coding abilities, moving beyond theoretical knowledge to practical application. By maintaining repositories like *AgroTrack* and *SwiftCart*, I demonstrate proficiency in version control (Git), commit discipline, and documentation. It highlights my ability to write clean, maintainable code and manage complex project structures, which are essential skills for any technical role.

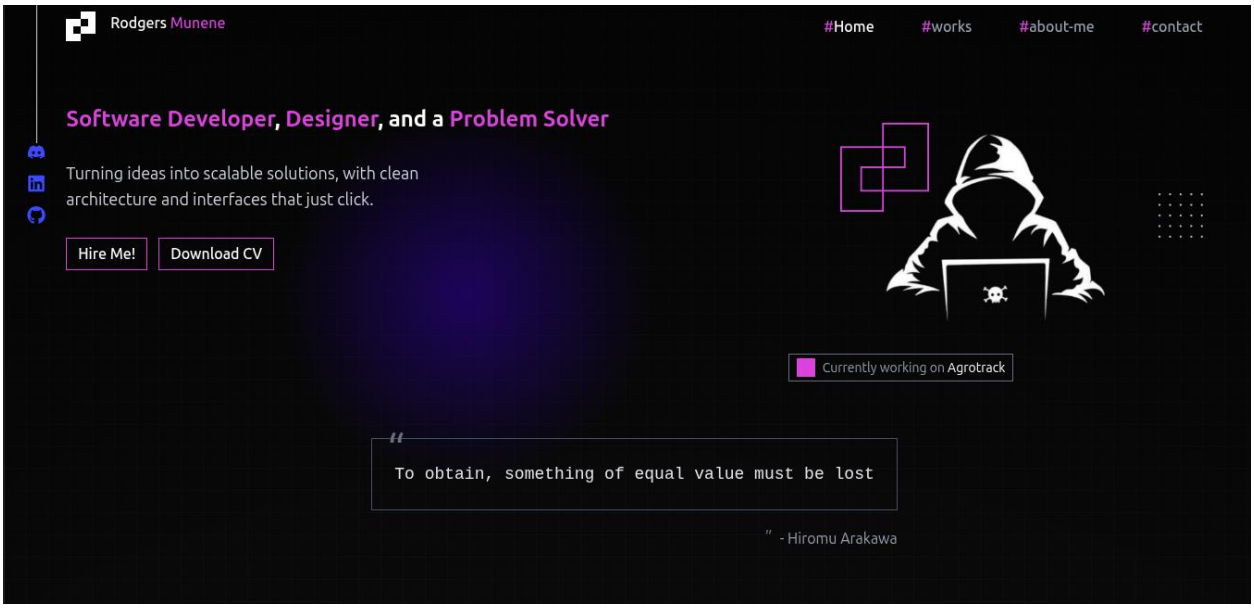
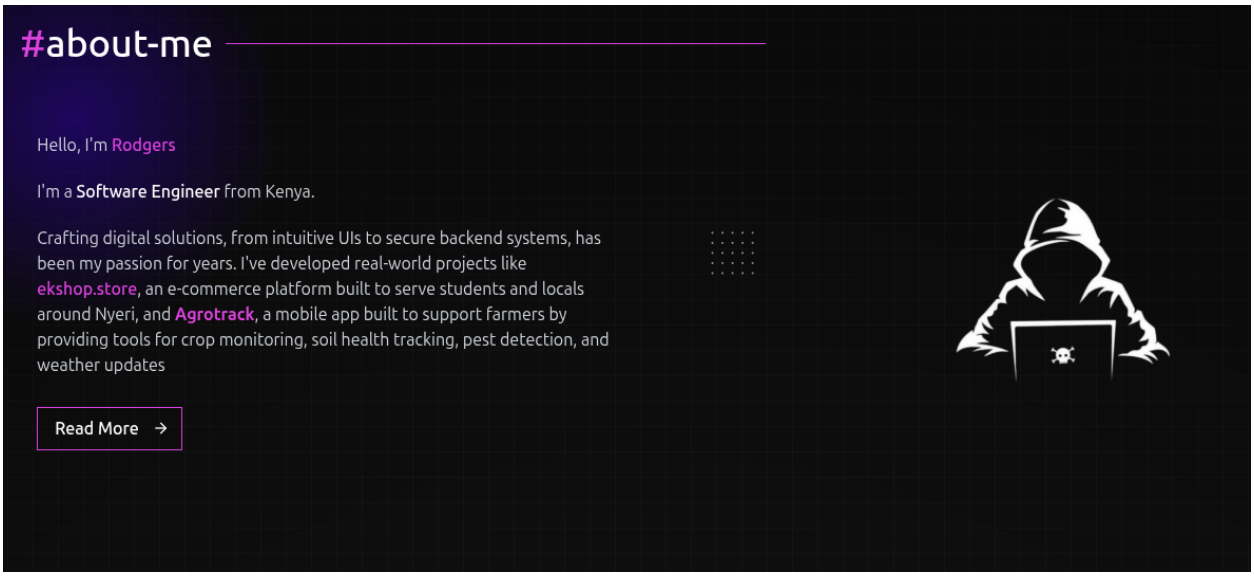
Page 4: Project Showcase

Platform 3 – Portfolio Website





Showcase Description: My portfolio website acts as the central hub for my digital identity. While GitHub shows *how* I code, this website shows *what* I build and *who* I am. It showcases a curated selection of my best projects with live demos, detailed case studies explaining my problem-solving process, and a downloadable version of my CV. It demonstrates my ability to deploy live applications and my attention to UI/UX design principles.

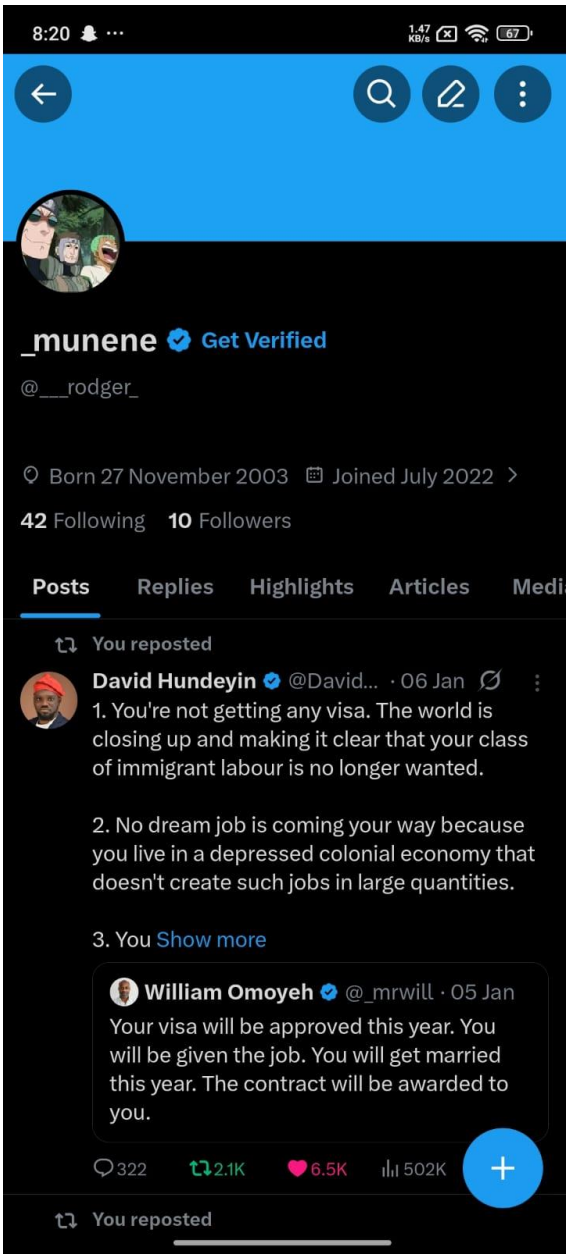
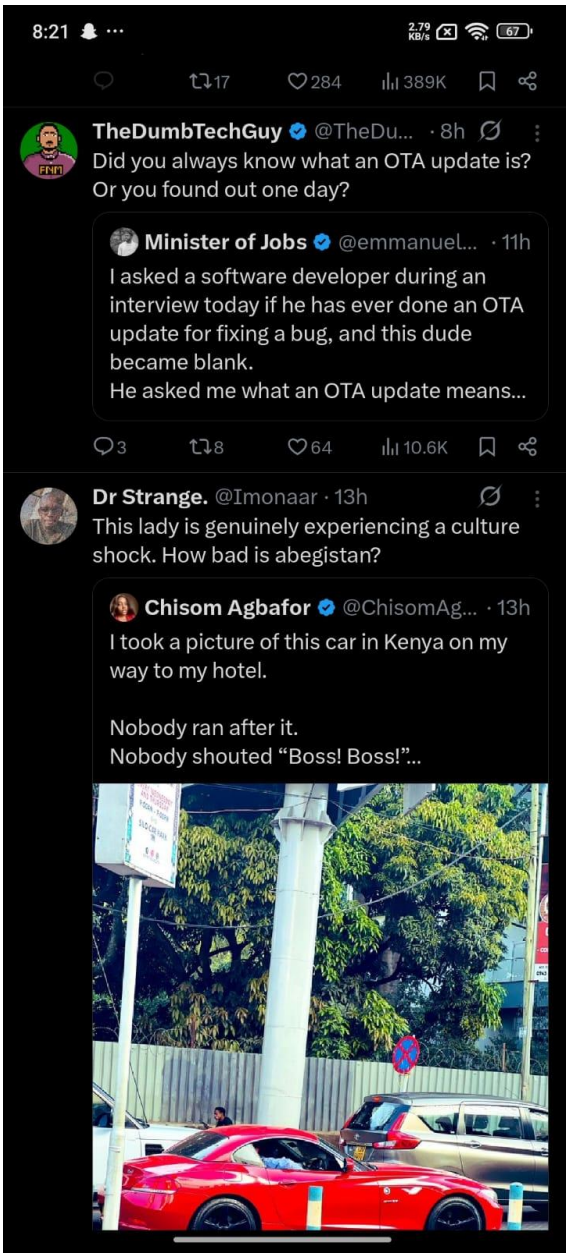
Page 5: Social Engagement

Platform 4 – X (Formerly Twitter) / Instagram





Professional Usage: I strictly curate this feed to focus on technology news, developer community discussions, and industry networking. I use it to follow thought leaders in the tech space and engage in conversations regarding software updates and hackathons. It demonstrates my genuine passion for the field outside of academic requirements and helps me build soft connections with peers in the industry.

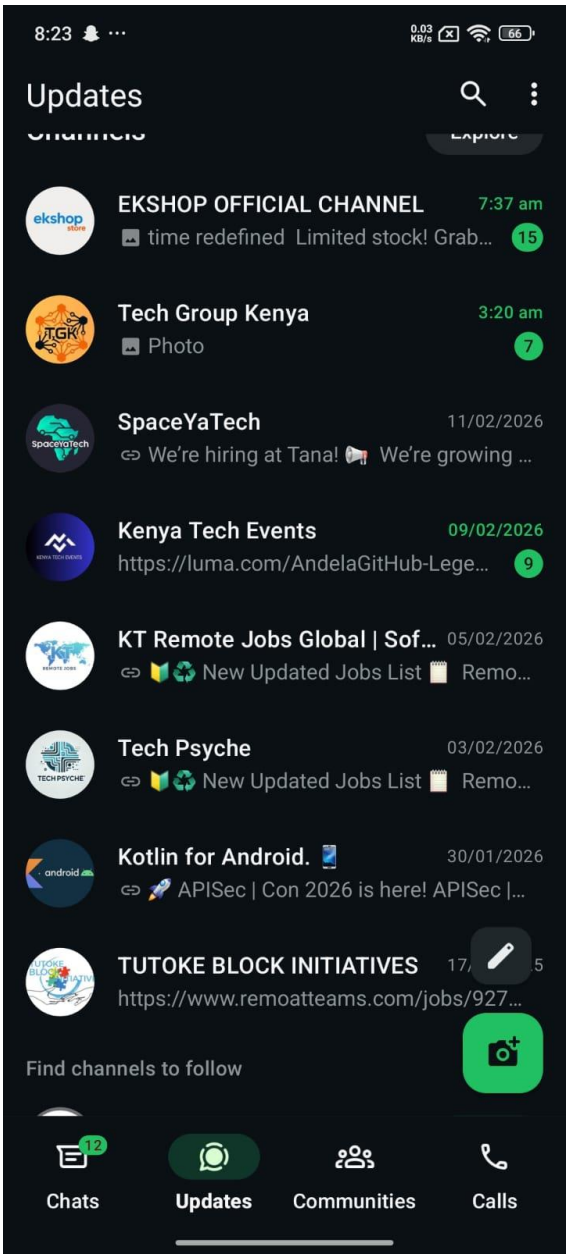
Page 6: Community & Communication

Platform 5 – Blog / Medium / WhatsApp Business



Relevance: This platform is used for thought leadership and direct professional communication. I use it to articulate technical concepts in simple terms, sharing

insights on challenges I have faced during development cycles (e.g., debugging *AgroTrack*). This demonstrates strong communication skills—the ability to explain complex technical ideas to non-technical stakeholders—which is a highly valued trait in project management and team collaboration.
